## REFRACTORIES APPLICATIONS FURNACES AND KILNS

### Process Information : Furnaces & Kilns

Furnaces and kilns are supplied to many manufacturing industries to carry out process heating or temperature induced reactions. Material requirements differ from application to application and require a broad range of materials.

We supply our full catalogue of materials in many standard and special shapes to this industry segment.

- Process temperatures to 1800°C
- Oxidising and reducing atmospheres
- High thermal shock

#### DISCLAIMER

Any advice, opinion, recommendation or information is given to assist the use of the company's products but on the basis that the end user must ensure their suitability for the application intended.

In particular the company cannot accept liability for loss or damage which may arise from the incorrect use of its products or from poor workmanship on the part of the user.

Information is compiled from routine quality control testing and does not constitute a specification.

Information is provided in good faith and is subject to review whenever necessary and no guarantee or warranty is implied.
