

VULCAN

REFRACTORIES APPLICATIONS SECONDARY ALUMINIUM

Product Requirements and Characteristics

Severe wear areas require a combination of non-wetting, abrasion resistance and toughness in order to extend life.

- Excellent erosion & abrasion resistance
- Good oxidation resistance
- Little or no wetting by aluminium
- Chemical inertness in the presence of aluminium
- High Strength

DISCLAIMER

Any advice, opinion, recommendation or information is given to assist the use of the company's products but on the basis that the end user must ensure their suitability for the application intended.

In particular the company cannot accept liability for loss or damage which may arise from the incorrect use of its products or from poor workmanship on the part of the user.

Information is compiled from routine quality control testing and does not constitute a specification.

Information is provided in good faith and is subject to review whenever necessary and no guarantee or warranty is implied.
