REFRACTORIES APPLICATIONS WEAR RESISTANCE

Product Requirements and Characteristics

Fine grained Silicon Nitride Bonded Silicon Carbide materials specially formulated for the production of cast special shapes, possess the necessary qualifications for improved service life.

- High acute angle particle abrasion resistance
- High sliding abrasion resistance
- High temperature abrasion resistance
- Resistant to acid corrosion
- High strength
- Lighter weight than metals
- Excellent thermal shock resistance

DISCLAIMER

Any advice, opinion, recommendation or information is given to assist the use of the company's products but on the basis that the end user must ensure their suitability for the application intended.

In particular the company cannot accept liability for loss or damage which may arise from the incorrect use of its products or from poor workmanship on the part of the user.

Information is compiled from routine quality control testing and does not constitute a specification.

Information is provided in good faith and is subject to review whenever necessary and no guarantee or warranty is implied.
